*

13. Write a paragraph on your favourite Indian scientist.

14. Read the following passage and make notes :

Sachin Tendulkar retired from International Cricket after playing his 200th test against the West Indies at Wankhade Stadium in Mumbai. The entire Indian team gave a moving lap of honour to the Little Master as soon as the match ended. The Master Blaster gave an emotional speech that had made everyone in tears. He said that his life had been between 22 yards for 24 years and it was hard to believe his wonderful journey was coming to an end. The important person in his life was his father whose guidance gave Tendulkar freedom at the age of 11 and told him to chase his dreams but make sure he did not find the shortcuts. Not to give up even though the path would be difficult. Whenever Sachin had done something special and he raised his bat, it was for his father. Sachin said, her mother was extremely patient and took care of him. His cricket teacher Acherekar Sir would take Sachin on his scooter all over Mumbai for practice. On a lighter note, Acherekar Sir never appreciated Sachin for 29 years so that he did not get complacent.

15. Write a letter to the Editor of an English newspaper about water scarcity in your village/locality.

16. Write a paragraph using the information given in the following tree diagram :

17. Write a report on Independence Day celebrations of your polytechnic.
18. Read the passage given below and answer the questions that follow :

The first result of the scientific outlook of Indians was the development of Sanskrit grammar. In the fifth century BC, Panini systematized the rules governing Sanskrit and produced a grammar called Ashtadhyaya. By the third century BC, Mathematics, Astronomy and Medicine began to develop separately. In the field of Mathematics, the ancient Indians made three distinct contributions; the notation system, the decimal system and the use of zero. The Indian notational system was adopted by the Arabs who spread it in Western world. The Indian numerals are called Arabic in English but the Arabs themselves called their numerals hinds. In the second century BC, Apastambha produced a practical geometry for the construction of altars at which the kings could offer sacrifices. It describes the acute angle, obtuse angle and right angle. Aryabhatta formulated the method for calculating the area of triangle, which led to the origin of Trigonometry. Indian dyers invented lasting colours and they also discovered the blue colour. We may recall that Indian smiths were the first in the world to manufacture steel.

Questions :

- (a) What was the first result of the scientific outlook of Indians?
- (b) What were the three distinct contributions made by the ancient Indians?
- (c) What led to the origin of Trigonometry?
- (d) Who manufactured steel first?
- (e) Write synonyms for the following words :
- (i) Distinct
- (ii) Lasting
